

## 'Moo to You'

Photo by Kandy Morris

Violet Wipf, 3, and other children and families got a chance to pat a very young calf, make butter, identify cheeses and learn about "The Comfy Cow" and "The Sustainable Cow" at a Sunday afternoon program at Ithaca's Sciencenter on May 13. "Moo To You" was put on by the Cornell University Dairy Science club (CUDS), an undergraduate group that helps educate the public about agriculture and dairy.
