Providing Science Professional Development for Early Childhood Teachers

May 16, 2017
Collaborative for Early Science Learning

- 6 museums across the country
- Delivering
  - Webinar series
  - Online tool kit
  - Conference session workshops

This project was made possible by the Institute of Museum and Library Services
Series Overview

Series of three webinars to provide tools for museum professionals to start, expand, or improve early childhood teacher professional development

- **May 9th** – Building and Sustaining Partnerships with Head Start
- **Today** – Providing Science Professional Development for Early Childhood Teachers
- **May 23rd** – Engaging Head Start Families in their Children’s Learning
Presenters

Lauren Van Derzee (Sciencenter, Ithaca NY)

Miriam Krause (Maryland Science Center, Baltimore MD)

Cheryl Juárez (Frost Science, Miami FL)

Vicki Starcevic (Turtle Bay Exploration Park, Redding CA)
Webinar Objectives

You will leave with:

▶ An understanding of the importance of incorporating science in early childhood classrooms

▶ Examples of museum-based professional development plans

▶ **Resources** you can use
Tell us about your experience poll
Why Science Professional Development?

- Science is developmentally valuable for young children
- Many teachers are uncomfortable with science
- Museums have resources and knowledge
Air Activity

- Pick 2 or 3 objects on your desk.

- Predict which object you can move by blowing on them.

- Play with different angles or blowing harder or softer.
Process Skills Poll

C E S L

Collaborative for Early Science Learning
Science Process Skills

Observing
Measuring
Communicating
Categorizing
Predicting
Experimenting
Drawing conclusions
Peep Video Poll

In the chat box share:

- How are the teachers in the video helping children develop science process skills?
Components of Professional Development

- Sign-in
- Snacks
- Ice breaker
- Introductions
- Review workshop goals
Components of Professional Development

▶ Hands-on activity

▶ Walk through activities with large, small group discussions

▶ Evaluation

▶ Distribute materials, training resources, and certificates
Case Studies: Catering PD to your teachers

- Frequency of workshops during the year
- Length of workshops
- Content/activities
- Number of participants
- Funding
- Other
Frost Science

▶ Content / Activities
▶ **Early Childhood Hands-On Science** (ECHOS) PD model allows participants to learn about preschool science pedagogy, try out lessons and activities, ask questions, network with other teachers.

▶ Each workshop introduces 2-3 ECHOS curriculum units: key concepts & lessons
Frost Science

- Number of participants
  - 33 teachers and 33 teacher assistants = 66!

- Frequency of workshops
  - 4 workshops per year

- Length of workshops
  - 3-hour workshops, on Saturdays or PD days

- Funding
  - W.K. Kellogg Foundation
Frost Science

- Blend of structures
  - Whole group: present key concepts, share implementation challenges and strategies
  - Small groups: hands-on station rotations
Frost Science

- Station Rotations

Lesson 1

Lesson 2

Lesson 3

Lesson 4

20 minutes per station!
Frost Science

Fishbowl Strategy

In this example, participants with the nametags pictured to the right will do the following at Station #1:

- Susie will be a lesson participant in the fishbowl (sitting at the table.)
- Terrell will be an observer outside of the fishbowl
- At Station #2, Susie and Terrell will switch roles.
Maryland Science Center

- Frequency of workshops
  - Single workshop, not a series
- Length of workshops
  - 3 hour workshops; generally in evenings or PD days
  - Workshops are Maryland State Department of Education approved for 3 clock hours of PD
- Content / Activities
  - MSC developed from many resources
Maryland Science Center

- Number of participants
  - 20-40 teachers, include assistant teachers & education coordinators

- Funding
  - Head Start Partnership, including workshops, is grant funded
  - Workshops for other groups are fee-for-service
Other

Head Start teachers also receive PD during classroom visits by MSC staff - model best practice of EC science

Online advertising through state EC training database

Offsite
Maryland Science Center

- **Icebreakers**
  - Hands or minds on activity at the beginning of the workshop
  - Set the tone
  - Allow participants to connect

### Who's Cooking?

<table>
<thead>
<tr>
<th>This person likes to cook at home.</th>
<th>This person models healthy eating to the children in their class.</th>
<th>This person has introduced fruits of vegetables to children.</th>
<th>This person has food allergies.</th>
</tr>
</thead>
<tbody>
<tr>
<td>This person has taken a cooking class.</td>
<td>This person likes to garden at home.</td>
<td>This person likes to make healthy foods.</td>
<td>This person has baked bread from scratch.</td>
</tr>
<tr>
<td>This person reads books about cooking with their children.</td>
<td>This person talks with the children about nutrition.</td>
<td>This person likes to try new recipes.</td>
<td>This person has changed recipes to accommodate food allergies.</td>
</tr>
<tr>
<td>This person likes to bake at home.</td>
<td>This person has done a cooking activity in their classroom.</td>
<td>This person grows herbs or vegetables with children at school.</td>
<td>This person likes to eat fruits and vegetables.</td>
</tr>
<tr>
<td>This person likes to try new foods.</td>
<td>This person reads books about gardening with their children.</td>
<td>This person grows fruit or vegetables at home.</td>
<td>This person has picked fruits or vegetables at a farm.</td>
</tr>
</tbody>
</table>
Turtle Bay Exploration Park

- **Content / Activities**
  - **GEMS (Great Explorations in Math & Science) guides are used for workshop**
  - Presenter will model activities for the teachers
  - Small and Large group discussions with hands on activities
  - End of workshop with reflections and Professional Growth Certificate

- **Frequency of workshops**
  - Offered twice per year, some returning teachers, some new, stand alone workshop

- **Length of workshops**
  - 4 hours
Turtle Bay Exploration Park

- **Evaluation**
  - Open ended

- **Number of teachers**
  - Max 40 teachers, includes site supervisors, lead teachers and assistant teachers

- **Funding**
  - Began as grant funded, some costs written into contract
  - Small cost

- **Other**
  - Lending Library
Sciencenter

- **Frequency of workshops**
  - Once a month 9 times per year
  - 2 year partnership
  - Funding from IMLS Science From the Start, donors, Tompkins Community Action

- **Length of workshops**
  - 1.5hrs
Sciencenter

- Number of teachers
  - Approximately 25
- Teachers teaching each other
Sciencenter

- **Content / Activities**
  - 2-4 lessons at each workshop
  - Choosing activities using *Early Childhood Hands-On Science, Marvelous Exploration through Science and Stories, and Peep and the Big Wide World*
  - Provide PD for teachers working
    - in a classroom with 0-3
    - in a classroom with 3-5
    - in children’s homes
  - Open ended, inquiry based activities
Sciencenter

- Bees
- Blocks
Resources

Museumtools.org

Families, teachers and other professionals are invited to use and share our hands-on activities guides and professional materials. The Sciencenter will continuously add relevant information to this page.

**KIDS & FAMILIES**

- Chemistry Activities

**EDUCATORS**

- Field Trips Supplemental Activities
- Chemistry Activity Lesson Plans

**COLLABORATIVE FOR EARLY SCIENCE LEARNING**

Resources to support museums partnering with local Head Start programs to provide teacher professional development and family engagement focusing on early childhood science.

- Launch a Collaboration
- Working with Head Start Teachers
