Exploring the 7 Senses

A story for ________________

by Racker

This story meets Social Story 10.2 criteria
There are seven senses in the human body.
The seven senses are:

- Sight
- Smell
- Touch
- Hearing
- Taste
- Balance (vestibular sense)
- Movement (proprioception)
The seven senses are different in each human body.

Kids may enjoy different activities based on their senses.
Some kids enjoy bright lights, and others do not.
Some kids love loud noises, and some kids need quiet.
Some kids need to jump, climb, and move.

Others like to keep both feet on the ground.
I am learning about the seven senses in the human body.
